## Benefits Reconciliation

Automatic identification of every discrepancy between your carrier invoices and benadmin system

## Custom Billing Solutions

Get custom processes and billing solutions tailored to your exact business needs.

# Beneration

## Monthly VerifiaBill Reporting Package

### Carrier Invoice Summary

Your benefits already involve too many vendors and payments - Beneration takes bill management off your plate. All of your carrier invoices are gathered and delivered in one secure online portal. A single summary lists your total charges for each carrier, invoice due dates, and remittance addresses. Consolidated bill payment optional.

### Cost Allocation Report

Make life easier for accounting by removing the hassle and time lost from converting and parsing a multitude of invoices from separate carriers. One report details every charge from every carrier, all allocated to your employees and specific cost centers so that you can account for every penny of your benefits spend.

### Discrepancy Identification Report

Carrier invoices and benadmin enrollment data are rarely a match. Inaccurate carrier charges, adjustments, and complicated HRIS plan setups all contribute to significant monetary errors. Beneration automatically identifies every single discrepancy between your carrier invoices and company enrollment data. Discrepancy reports save you money and ensure employees always have access to care.
